

Overview

The Logic Model Planning and Reporting System (LMPRS) is a flexible, web-based planning and reporting tool for capturing data used in program development and evaluation-based planning and reporting for Cooperative Extension and Agricultural Experimental Station programs. LMPRS was created and is supported through a collaborative effort by four states.

- Launched in 2007, LMPRS is currently in use at six land-grant universities.
- Collects and manages the five-year planning and annual reporting data required by USDA/NIFA, as well as by a variety of additional state and local stakeholders.

Benefits

- Proven Track Record
 - Used in 6, unique state Extension programs
- Customizable By Institution
- Flexible
 - Easy access with preformatted and customized reports
- Easy and Effective
 - Based on the logic model
 - Individuals report against elements contained in their plans
 - Individuals can report unplanned activities and impacts

Pricing

The 2013 LMPRS is available as hosted Software as a Subscription (SaaS) under a three year license agreement. LMPRS is priced in tiers based on organization size with a 1st year fee and yearly renewal fees in years 2-3.

Example pricing:

- Org size <100 \$7500 first year fee \$2500 annual renewal fee years 2-3
- Org size 101-200 \$15,000 first year fee \$5000 annual renewal fee years 2-3
- Org size 201-300 \$22,500 first year fee \$7500 annual renewal fee years 2-3
- Org size >300 \$30,000 first year fee \$10,000 annual renewal fee years 2-3

Please contact us to discuss your organization's specific needs and we will provide a quote and draft license agreement for your review.
